LH51 LH52

Compact display with numerous functions for milling machines (LH51) and lathes (LH52)

- Selectable display resolution
- Selectable ABS/ INC display
- •Linear error compensation
- •Standard functions: reset, preset, recall, data storage, datum point memory, midpoint calculation and zero point detection
- •Milling functions (LH51): touch sensor and bolt hole circle
- •Lathing functions (LH52): hold, addition and tool offset
- Inch/metric display

Specifications

| Model | LH51-1 | LH51-2 | LH51-3 | LH52-3 |
|---------------------------|---|--------|----------------------|--|
| No. of connectable axes | 1 | 2 | 3 | 3 |
| No. of display axes | 1 | 2 | 3 | 2 |
| Display | 7 digits, LED display, mode indication (leading zero suppress, floating minus sign) | | | |
| Display resolution | Varies with the transducer (0.5 μm with Magnescale) | | | |
| Max. response speed | Varies with the transducer (60 m/min with Magnescale) | | | |
| Reset | By key operation or external reset | | | |
| Preset | By key operation | | | |
| Recall | Data stored by preset can be recalled by key operation | | | |
| Linear error compensation | When the table moves a certain distance, a unit length is added or subtracted from the displayed value (linear compensation) | | | |
| | 256 compensation values; maximum: ± 600 μm/m | | | |
| Absolute/ Incremental | With the datum point set at any point on the scale, the absolute distance from the point can be displayed while machining in the INC mode | | | |
| Datum point memory | Set by key operations | | | |
| Touch sensor | Used with the optional Touch Sensor, LH51 detects the datum plane 1.Hold 2.Load 3.Centering — — | | | |
| Zero point detection | Used with a transducer having a zero point, LH51/52 detects the zero point and reproduces a datum point | | | |
| Bolt hole circle | _ | | ns: 2 to 360; offset | _ |
| Midpoint calculation | angle: 0° to 359.999° in 0.001° steps In the INC mode, the displayed value can be halved by a simple key operation | | | |
| | | | | |
| Hold | = | | | The display value is held and a tool offset can be set with a key switch |
| Addition function | _ | | | 2-axis addition (Z1 + Z2) can be displayed |
| Tool offsets | _ | | | Max. 9 |
| Data storage | Preset value and the value that was displayed before power-off are stored in non-volatile memory | | | |
| Alarm display | Power interrupt 2. Max.response speed exceeded 3. Error in stored data 4.Scale disconnected | | | |
| Operating temperature | 0 °C to 40 °C / 32 °F to 104 °F (No condensation ; see note 1) | | | |
| Storage temperature | -20 °C to 60 °C / -4 °F to 140 °F | | | |
| Power supply | 100 V AC to 230 V AC ± 10 % 50/60 Hz | | | |
| Power consumption | Max. 35 VA | | | |
| Mass | Approx. 1.6 kg /3.53 lbs | | | |

Note 1 : Guranteed ranges under the applicable safety standard are 0 to 31°C (80% RH), 31°C (80% RH), to 40°C (50% RH).
